

# Box

## Overview

The Box app for Hootsuite allows you to access stored content from your Box account, attach and share media across your social accounts.

## What you need

### Box account

[Sign in](#) with your Box account or [create one!](#)

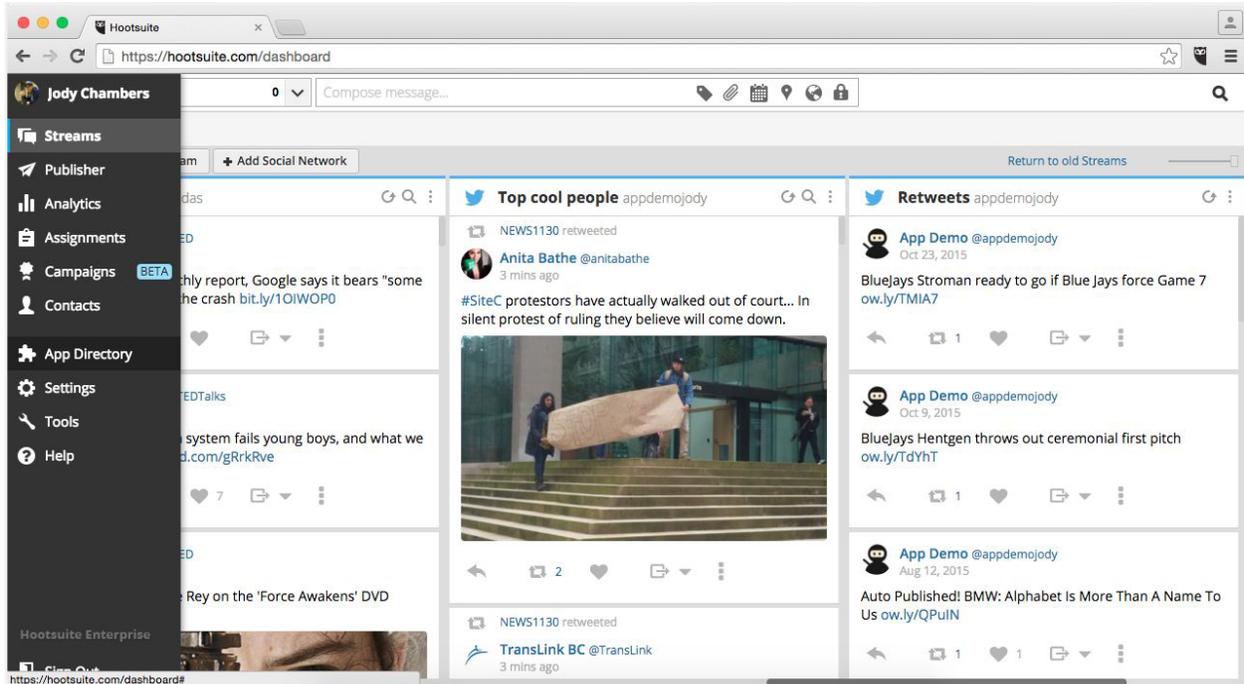

### Hootsuite account

Use the [Box for Hootsuite app](#) with a Free, Pro, or Enterprise Hootsuite account.

# Installing the Box app

From your Hootsuite dashboard, click on the App Directory side menu item. Once the modal opens search for Box in All Apps and click Install.

After clicking Install, a new window will open where you can select to add a Box app to your Hootsuite account.

Next, enter your Box for Business Site Address in the field. Click Connect Box.

Now that the app is installed, you can navigate to the Hootsuite Publisher within Dashboard and click on the Box tab under Content Sources.

## Using the app

Once you have the app installed, it's time to attach some media from Box to your messages sent through Hootsuite

### Selecting Media

Select your desired content by clicking Attach icon, for single images,

or the box in the top right corner of the image container and click the attach icon next to the breadcrumb navigation, to attach multiple images.

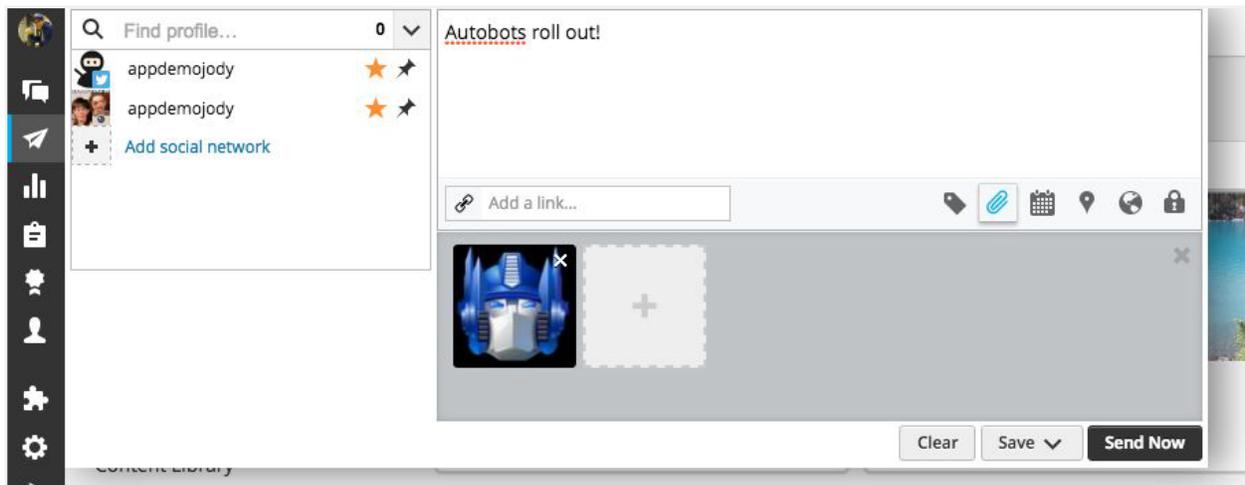

The image(s) will show up attached in the Compose view

## Write a comment along with the post

You can add text to the post in the Compose box and select which network you would like to publish the post to.

## Send it!

Click the Send Now button! Done!

---

## Uninstalling the app

Not that you would ever want to uninstall the Box app for Hootsuite...but if for some reason someone forced you to uninstall it, here are the steps.

### Open the App Directory

Navigate to the Box app in Installed Apps and click the garbage can icon to remove the app.
